MOSELEY'S TUBULAR WROUGHT IRON

ARCH BRIDGES AND ROOFS. THESE Bridges and Roofs have now been fully tested In this vicinity, and it is universally conceded that they cannot be excelled. The Roofs are wholly of Wood and Iron, or mixture of Wood and Iron; Sheeting always Iron.

Wrought from always from.

The Bridges are wholly Wrought Iron except the floor, which is wood, like the floors of ordinary Bridges We are prepared to make these structures in any quantities, at prices about as follows:

Ruifrond Bridges, 50 feet span, 8,000 lbs, \$17 50 per foot lineal.

Railroad Bridges, 50 feet span, 8,000 lbs, \$17 50 per foot lineal.

Common Road or Turnpike, 50 feet span, 2,600 lbs, \$5 75 per foot lineal.

Roots, all iron, 50 feet width of building, \$25 per 100 squa e feet, part wood and part iron, from \$12 to \$20 per square.

Increase of span of bridges or width of buildings makes an increase of price, but the increase in price is no more than the increase of wooden structures.

We can furnish Iron of every size to work into Bridges and Roofs, and Railroads or other companies buying the right to use them and the Iron of us, can mate their own structures one third less than the above prices. Our structures weigh only tron 1-4 to 1-10 that of wood; difference in freight in a long distance buys our work. In a few days we will have at our Factory, 497 West Third street, in this city, four different specimens of our Roof, where the public can inspect them to their satisfaction. We beg them to give us a call, as all our work is warranted, and we ask no pay on ordinary jobs until the work is done and approved, payments being secured on contracting. Office No. 66 West Third street, Cincinnati, O.

edge, In Morocco, full gilt sides and edges, TWENTY SIX THOUSAND COPIES of this elaborate work have already been sold! The flattering confidence indicated by this liberal patronage has induced the Author and Publishers to revise the Work thoroughly, to bring it down to the latest period, and to introduce

New and Superior Illustrations. Thus improved and perfected, it is believed that no other Universal History can compare with this, for the fullness and accuracy of its statements, the convenience of its arrangement, the clearness simplicity and dignity of its style, for the consequent interests which it expected its art the clearness of its mechanics, or for the durability and neatness of its mechanical execution.

From the many recommendations of this Work we have only room for the following: From Rev. Dr. Tefft, late President of Gennesses Cellege.

Gentlemen:—Having made a particular examination of Goodrich's 'History of All Nations," I am tree to say, that I know of no work, great or small, that centains half the amount of useful and entertaining matter for family reading. It is written in Mr. Goodrich's best 'tyle. It is a library, a historical library of itself; and it is worth, according to the usual cost of good reading, two or three times the money you ask for it. It is ne wonder that you have to keep a power press running constantly to supply the orders for these volumes; for the public have only to know their value to make them a universal want with all classes.

I am, gentlemen, most respectfully yours.

Extract from a Letter from Ex-President Fillmore. I think it eminently deserving of the public patron-ige. It is necessifily brief; but it brings under re-row, with its admirable illustrations, the principal subets worth of attention in all nations, and to the young specially, it is invaluable.

I have been familiar with Mr. Goodrich's writings for many years, and have the pleature of a personal acquaintance with him; and think him admirably qualified for imparing instruction in a way that brings it within the reach of the common mind.
